

## MS Access Database Developer

*Spragens & Associates, LLC is a private business consulting practice located in Durham, North Carolina with significant expertise in: strategic planning, business planning, leadership support for non-profit and health care organizations. Over half of our consulting efforts is dedicated to the emerging field of palliative care, serving the expanded market need for providing effective and compassionate care to the severely ill and aging patient populations. We work with health care organizations interested in building successful palliative care programs and help them estimate the potential and evaluate the financial and operational impact of a palliative care program in their organizations.*

We are currently looking for an outside contractor to maintain an existing stand-alone MS Access / Excel software application developed by Spragens & Associates, LLC and provide primarily phone-and email-based technical support for client installations and application use (typically during normal business hours only).

### Job Requirements

#### Technical Skills:

- Must be able to design and develop database applications using MS Access, Visual Basic for Applications, Excel and SQL.
- Understand database design, including tables, fields, keys, linking tables, queries, and normalizing data.
- Design/build custom reports using MS Access and Excel, including charts and dashboards.
- Must be able to convert, sort, cleanse, reconfigure and upload data from multiple sources.
- Must have demonstrated ability to troubleshoot software applications and document technical modifications
- Must have excellent communication skills, especially an ability to communicate both at an informed technical level with hospital IT professionals and on a non-technical level with medical staff who are the primary users of the software.
- Must be detail-oriented
- Must have the ability to develop relationships with customers--independently identifying options, developing solutions, and taking prompt action when responding to customer needs.
- Experience in healthcare or healthcare-related environment a definite plus.
- BS in Computer Science or equivalent
