We are looking for undergraduate or graduate student candidates with a background in biomedical engineering, materials science, or other life science field with a keen interest in developing business skills through an internship with the Center of Innovation for Nanobiotechnology.

As a Business Development Intern, you would be responsible for assisting in market research, contributing to grant submissions, and critical analysis of technologies, markets and business opportunities.

Previous experience(s) desired: Business development (e.g. market assessment, branding, website design) - NOT REQUIRED

Desired Skills: Ability to work independently, Outstanding academic achievement, Entrepreneurial mindset

Key Responsibilities Might Include: Marketing Analysis, Grant-Writing, Database Development, Website Design

Time Commitment: Varies depending on projects, intern availability

Stipend: Some projects carry a stipend while others will be unpaid
