ADVISING STUDENTS WHO INTEND TO TRANSFER TO NORTH CAROLINA STATE UNIVERSITY

NCSU is a school which is oriented towards math and science. They require two pure mathematics courses as a part of their General Education Core courses. The mathematics courses selected to fulfill the General Education Core requirements must be from MAT 140/140A, 151, 161/161A, 171/171A, 172/172A, 263/263A, 271, 272, 273, or 285.

If a student selects a major (such as engineering) at NCSU that requires MAT 271 and 272 (Calculus I and II) and the student takes those two courses here at Durham Tech, the student must earn at least a B in one of those two courses. Of course, the other grade must at least be a C.

NCSU will not give credit for PHY 251 or 252 unless the pre-requisites for those two courses have been met, specifically MAT 271 before PHY 251 and MAT 272 before PHY 252.

NCSU posts on their admission website the requirements for admission to specific schools. You may access that site easily through the Virtual Transfer Center.

Many programs at NCSU require that you complete the third semester of a foreign language. To find out which programs require the third semester go to the NCSU website.

NCSU has limited transfer openings for the spring semester. Most NCSU admissions are for the fall.
