ADVISING STUDENTS WHO INTEND TO TRANSFER TO UNIVERSITY OF NORTH CAROLINA AT CHAPEL HILL

UNC has developed a new General Education Core Curriculum effective Fall 2006. Students who wish to transfer to UNC, should make themselves aware of the details of those new requirements in order to maximize their transferability.

UNC requires the third semester of foreign language for graduation. Some programs require four. Check the graduation requirements found through the Virtual Transfer Center to be certain. We recommend that students complete their foreign language requirements here at Durham Tech.

UNC does not accept MAT 161/161A as a course satisfying the General Education core mathematics requirements (it does accept the course as an elective). It accepts MAT 171/171A as placement. Students are advised to select two math courses from MAT 140, 151, 172, 263, 271, 272, 273 to satisfy their General Education Core mathematics course requirements (of course, they must satisfy the pre-requisites for those courses or be placed into it by admissions). Consult the graduation requirements posted on the Virtual Transfer Center to determine which math courses are most appropriate.

UNC states that they admit students only after they have completed 51 hours of transferable course work. Recently, they disavowed this statement, but I think that it is more true than not true.

Some UNC schools (Ex: School of Education, School of Journalism) are very specific about the coursework that they require of transfer students. Go to the website for the plans-of-study for each major at http://advising.unc.edu/new-curriculum-worksheets/new-curriculum-worksheets

UNC admits students in the fall only, with the exception of some programs with special requirements, such as nursing. Consult the UNC-CH website for details.
