**Evaluation of Performance Descriptions**

**In-class activities, online/homework assignments** – Students will be required to complete daily assignments in preparation for class discussions, projects, and assignments. These assignments include blog posts of 75-100 words, forum posts that are comprised of 75-100 words in addition to required responses to their class members. Homework assignments are related to the specified reading and focus on students’ understanding and ability to conduct a STAP analysis (subject, thesis, audience, purpose). Each assignment has a related rubric and are detailed on the Sakai site. Students are also expected to come prepared to class for in-class activities and discussions as they relate to the assigned readings before each class period. These in-class activities include student-centered activities, such as Harkness discussions, Fishbowl discussions, small group and pair work, which when graded are assessed with a grading rubric.

**Double-Entry Notebook and Vocabulary Journal** - Students will be required to follow the specifications (listed in the rubric) for their notebook and make an entry for each reading/listening assignment. These notebooks follow a specific formula to help students learn to read, comprehend, analyze, and respond to the reading assignments at the college-level. Students are expected to write down important quotes from the reading/listening assignments and write their questions about their meanings and response/analysis. Students should write at least seven quotes per reading assignment along with seven responses. In addition, students are responsible for tracking their own vocabulary learning. For each reading/listening assignment, students should record no fewer than five vocabulary words, but no more than ten new words. Along with the words, students are required to write the definitions and attempt to use the word in a new sentence, relating it to the reading/listening assignment. Students will use these notebooks during class discussion, so these should be brought to class each day. Students will be assessed according to the specified rubric.

**Project #1 – Current Issues in U.S. Education** – In this project, students will choose from a list of topics that relate to education and complete the project steps according to the specifications. As the final step, students will present their research and findings to the class in a 12-15-minute PowerPoint presentation. MLA Citations and references are required as part of the assignment requirements. The project will be assessed according to the rubric.

**Project #2 – Powerful Women around the World** – For this project, students will choose one of the 100 most influential women as noted by *Forbes* magazine. Students will research the specific field that the woman is in and find a scholarly journal article that is related to her field of work, study, or focus. From their scholarly article, students will create a 12-15-minute presentation with its focus on this article. In addition, and in correlation with the scholarly article, students will integrate information about the woman’s personal life, her history in business, politics, her job, and deduct from this information why they believe *Forbes* Magazine included her among the top 100. Students will also be required to conduct one interview of someone who is familiar with or in the same field as the woman chosen for their project. This person’s opinion will be included in the presentation. The interview must be conducted in English. This project’s design is to help students improve research, comprehension, and presentation skills, and to help them continue developing the critical thinking skills necessary for U.S. Academic English reading and writing.
Tests/Quizzes – Periodically, students will be given comprehension quizzes related to their assigned readings in order to test their understanding and hold them accountable to reading assignments.
