- Application to physical therapy programs requires completion of a bachelor's degree.
- Students who have not yet completed a bachelor's degree should follow the course selection guide for their major, while keeping these requirements in mind as a goal to complete by the end of the bachelor's degree.
- Students should review all material on the schools' websites. Physical therapy programs may require additional prerequisites beyond coursework, such as standardized tests and patient care experience. Requirements may change, and restrictions on online coursework and time limits often apply to science coursework.
