Alpine® WSG
Water Soluble Granule Insecticide

KILLS: Ants (including Argentine, Carpenter, Harvester, Odorous House, Red Imported and Southern Fire, excluding Pharaoh), Asian Lady Beetles, Brown Platax (Kurina Bug), Red Bugs, Brown Rumphoi Stink Bugs, Mophead, Collombus, Cockroaches, Earwigs, Flies, German Cockroaches, House Flies, Millipedos, Mosquitoes (Anopheles), Paper Wasps, Pillbugs, Spiders (excluding Brown Reclus), and Yellowjackets

FOR USE IN AND AROUND: Apartments, Cemeteries, Cottages, Dog Kennels, Food Handling Establishments, Greenhouses, Homes, Hotels, Hospitals, Hotels, Hotels, Mobile Homes, Motels, Food Processing Plants, Nursing Homes, Resorts, Schools, Storage Buildings, Trailers, Transportation Equipment (Autos, Buses, Boats, Ships, Trains, Trucks, Planes [cargo areas only]), Utilities, Warehouses, Commercial, Industrial and Residential Buildings, Theme Parks, Parks & Recreational Areas, and Zoos

ACTIVE INGREDIENT:
Dinoterbin (N-propynyl N-[4-hydroxy-3-hydroxyaldehyde] p-anisidine)

OTHER INGREDIENTS:
40.0%

TOTAL: 100.0%

EPA Reg. No. 499-561

KEEP OUT OF REACH OF CHILDREN

CAUTION
Product of Japan.

FIRST AID
IF IN EYES: Hold eyes open and rinse slowly and gently with water for 15 – 20 min. Remove contact lenses, if present, after the last 5 min, then continue rinsing eyes. Call a poison control center or doctor for treatment advice.
IF INHALED: Remove victim to fresh air and keep calm. If symptoms occur, call a doctor or poison control center.
IF INGESTED: Do not induce vomiting unless instructed to do so by a doctor. Do not give anything by mouth to an unconscious person. Call a doctor or poison control center.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION. Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash hands thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Wear long-sleeved shirt and long pants, socks, and shoes, and chemical-resistant gloves made out of any waterproof material, such as Natural Rubber, selector Category A.

USER SAFETY RECOMMENDATIONS
Use should:
• Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
• Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
• Remove PPE immediately after handling this product.
• Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This pesticide is toxic to aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift to treated areas. Drift and runoff from treated areas may be hazardous to aquatic organisms in water adjacent to treated areas. Do not deposit equipment washwaters or rinsates into any natural stream or water body. This product is toxic to honey bees. The persistence of residues and potential residual toxicity of Dinoterbin in nectar and pollen suggests the possibility of chronic toxic risk to honey bee larvae and the eventual instability of the hive.
• This product is toxic to bees exposed to residues for more than 30 days following treatment.
• Do not apply this product to blooming, pollen-shedding or nectar-producing parts of plants if bees may forage on the plants during this time period, unless the application is made in response to a public health emergency declared by appropriate state or federal authorities.
Dinoterbin and its degradation, MINS, have the properties and characteristics associated with chemicals detected in groundwater. The high water solubility of Dinoterbin, and its degradation, MINS, coupled with their high mobility, and resistance to biodegradation indicates that this compound has a strong potential to leach to the subsurface, under certain conditions, as a result of label use. Use of this chemical in areas where soils are permeable, particularly those where the water-table is shallow, may result in groundwater contamination.

PROTECTION OF POLLINATORS
APPLICATION RESTRICTIONS
APPLY FOR THIS PRODUCT
• Because of risk to bees and other insect pollinators, follow application restrictions found in the Directions for Use for protection of pollinators.

Look for the bee hazard icon, in the Directions for Use for each application site for specific use restrictions and instructions to protect bees and other insect pollinators.

This product can kill bees and other insect pollinators. Bees and other insect pollinators will forage on plants when they flower, shed pollen, or produce nectar. Bees and other insect pollinators may be exposed to this pesticide from:
• Direct contact during pollen applications, or contact with residues on plant surfaces after pollen applications.
• Ingestion of residue in nectar and pollen when the pesticide is applied as a dust, or vessel storage.

When Using This Product Take Steps To:
• Minimize exposure of this product to bees and other insect pollinators when they are foraging on other pollinator-attractive plants around the application site.
• Minimize drift of this product on to bees or to other pollinator-attractive habitat. Drift of this product onto bees or to site to pollinator attractive habitat can result in bee kills.

NOTE: This specimen label is for informational purposes only. All uses may not be approved in all states. See labeling which accompanied product for Directions for Use or call 800-777-6700 for more information.
Alpine® WSG Water Soluble Granule Insecticide

MIXING INSTRUCTIONS
Thoroughly clean spray equipment before mixing and application of this product.
0.55 oz (10 g) Packet: Add approximately 1/2 of the water to the spray tank. Test open container and contents to water, then complete the filling of the spray tank. Agitate the tank until the product is completely dissolved. Reagents for product dilution if application is interrupted for an extended period of time or if dilution is left in tank overnight.
1 lb, 1.64 oz (60 g) Reusable plastic bottle: Add approximately 1/2 of the water to the spray tank. Add 10 - 30 g of product to water per 1,000 ft² area being treated (T = 10g), then complete the filling of the spray tank. Agitate the tank until the product is completely dissolved. Reagents for product dilution if application is interrupted for an extended period of time or if dilution is left in tank overnight.

SPRAY DILUTION CHART

<table>
<thead>
<tr>
<th>Desired Finished Dilution Concentration</th>
<th>Amount of product to make 1 gal of finished dilution up to 1,000 ft²</th>
<th>Amount of product to make 5 gal of finished dilution up to 5,000 ft²</th>
<th>Amount of product to make 25 gal of finished dilution up to 25,000 ft²</th>
<th>Amount of product to make 50 gal of finished dilution up to 50,000 ft²</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.1%</td>
<td>10g</td>
<td>50g</td>
<td>250g</td>
<td>500g</td>
</tr>
<tr>
<td>0.2%</td>
<td>20g</td>
<td>100g</td>

<tr>
<td>0.3%</td>
<td>30g</td>
<td>150g</td>
<td>750g</td>
<td>1,500g</td>
</tr>
</tbody>
</table>

Refer to specific pest categories below for the proper use rate. One gallon of finished dilution treats 1,000 ft². Depending on the surface, more or less water may be used to properly treat areas with different application apparatuses, but the proper amount of active ingredient should be used per square footage.

Tank Mixing: This product may be tank mixed with other water based insecticides including, but not limited to, insect growth regulators (IGR), quick knockdown products and residuals. Before mixing test to see if products are compatible. When tank mixing, follow the more restrictive tank use directions of the mixed products.

Application: Place the desired amount of the product over the entire treatment area, but avoid mixing it into the foliage. This product will move through the foliage into the soil and be active to the soil. Do not apply to dry plants. Apply to moist soil.

INDOOR APPLICATIONS

Ants [excluding Pharaoh](10g/gal): Make spot, Crack & Crevice and/or void applications where ants may be foraging or nesting, such as around edges, doors, window frames, under cabinets, around pipes in and slip voids, areas where ants may find access or next.
Flies (10g/gal): Apply to infested areas or potentially infested areas, such as rooms, floors, carpets, upholstered furniture, pet beds and pet resting areas. When applying to upholstered furniture, treat under cushions and areas where these develop canisters do not have to be treated. Pet products can be treated as well if applied as a wet spray. Direct application of this product to any body of water is prohibited.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool, dry area away from heat or open flame.

PESTICIDE DISPOSAL: Wash water resulting from the use of this product in a manner that will not cause pollution of the water supply. Use a suitable container to dispose of this product.

CONTAINER HANDLING: [single-use packets] Nonrefillable container. Do not reuse or refill this container. Do not apply this product directly to plants. Apply only to the soil and adjacent areas. Do not contaminate water, food or feed by storage or disposal. Do not apply directly to water. To dispose of this product, do not incinerate. Place in a lined trash container and dispose of according to local laws and regulations.

CONDITIONS OF SALE AND WARRANTY

Follow the Directions for Use. It is impossible to eliminate all risks inherently associated with use of this product, and therefore all such risk shall be assumed by the User. Whitmore warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions for Use. User assumes the inherent risks, referred to above. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW: (A) WHITMORE MAKES NO OTHER WARRANTIES EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR PARTICULAR PURPOSE OR MERCHANTABILITY, (B) BUYER'S EXCLUSIVE REMEDY AND WHITMORE'S AND SELLER'S EXCLUSIVE LIABILITY, WHETHER EXPRESS OR IMPLIED, OR OTHERWISE, SHALL BE LIMITED TO REIMBURSEMENT OF THE PURCHASE PRICE OF THE PRODUCT, AND (C) WHITMORE AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, INCIDENTAL, SPECIAL, OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT. Whitmore and the Seller offer this product, and the Buyer accepts it, subject to these Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of Whitmore.

NOTE: This specimen label is for informational purposes only. All uses may not be approved in all states. See labeling which accompanied product for Directions for Use or call 800-777-6570 for more information.
1. Product and Company Information

Company
BASF CORPORATION
100 Park Avenue
Florham Park, NJ 07932, USA

24 Hour Emergency Response Information
CHEMTREC: 1-800-424-9300
BASF HOTLINE: 1-800-832-HELP (4357)

Registrant:
Whitmire Micro-Gen Research Laboratories, Inc.
3668 Tree Court Industrial Blvd.
St. Louis, MO 63122

Substance number: 0000006552911
Synonyms: Dinotefuran

2. Hazards Identification

Emergency overview

CAUTION:
KEEP OUT OF REACH OF CHILDREN.
KEEP OUT OF REACH OF DOMESTIC ANIMALS.
Causes eye irritation.
Avoid contact with the skin, eyes and clothing.
Wash thoroughly after handling.

See Product Label for additional precautionary statements.

State of matter: solid
Colour: white
Odour: odourless

Potential health effects

Primary routes of exposure:
Routes of entry for solids and liquids include eye and skin contact, ingestion and inhalation. Routes of entry for gases include inhalation and eye contact. Skin contact may be a route of entry for liquified gases.

Acute toxicity:

Irritation / corrosion:
May cause slight irritation to the skin. May cause moderate but temporary irritation to the eyes.
Safety Data Sheet
ALPINE WSG
Revision date: 2013/05/21
Version: 2.0

Sensitization:
There is no evidence of a skin-sensitizing potential.

Chronic toxicity:

Repeated dose toxicity: The product has not been tested. The statement has been derived from the properties of the individual components. No substance-specific organotoxicity was observed after repeated administration to animals.

Medical conditions aggravated by overexposure:
Individuals with pre-existing diseases of the respiratory system, skin or eyes may have increased susceptibility to excessive exposures.

Potential environmental effects

Aquatic toxicity:
There is a high probability that the product is not acutely harmful to fish. There is a high probability that the product is not acutely harmful to aquatic invertebrates. There is a high probability that the product is not acutely harmful to aquatic plants.

4. First-Aid Measures

General advice:
Remove contaminated clothing.

If inhaled:
Keep patient calm, remove to fresh air.

If on skin:
Wash thoroughly with soap and water.

If in eyes:
Wash affected eyes for at least 15 minutes under running water with eyelids held open.

If swallowed:
Rinse mouth and then drink plenty of water.

Note to physician:
Treatment: Symptomatic treatment (decontamination, vital functions).

5. Fire-Fighting Measures

Flash point: not applicable
Lower explosion limit:

As a result of our experience with this product and our knowledge of its composition we do not expect any hazard as long as the product is used appropriately and in accordance with the intended use.
6. Accidental release measures

Personal precautions:
Use personal protective clothing. Avoid contact with the skin, eyes and clothing. Avoid dust formation.

Environmental precautions:
Do not discharge into the subsoil/soil. Do not discharge into drains/surface waters/groundwater.

Cleanup:
Dispose of absorbed material in accordance with regulations. Collect waste in suitable containers, which can be labeled and sealed. Clean contaminated floors and objects thoroughly with water and detergents, observing environmental regulations. Avoid raising dust. For small amounts: Contain with dust binding material and dispose of. For large amounts: Sweep/shovel up.

7. Handling and Storage

Handling
General advice:
RECOMMENDATIONS ARE FOR MANUFACTURING, COMMERCIAL BLENDING, AND PACKAGING WORKERS. PESTICIDE APPLICATORS & WORKERS must refer to the Product Label and Directions for Use attached to the product for Agricultural Use Requirements in accordance with the EPA Worker Protection Standard 40 CFR part 170. Ensure adequate ventilation. Provide good ventilation of working area (local exhaust ventilation if necessary). Keep away from sources of ignition - No smoking. Keep container tightly sealed. Protect contents from the effects of light. Protect against heat. Protect from air. Handle and open container with care. Do not open until ready to use. Once container is opened, content should be used as soon as possible. Avoid dust formation. Do not return residues to the storage containers. Follow label warnings even after container is emptied. The substance/product may be handled only by appropriately trained personnel. Avoid all direct contact with the substance/product. Avoid contact with the skin, eyes and clothing. Avoid inhalation of dusts/mists/vapours. Wear suitable personal protective clothing and equipment.

Protection against fire and explosion:
The relevant fire protection measures should be noted. Fire extinguishers should be kept handy. Avoid all sources of ignition: heat, sparks, open flame. Sources of ignition should be kept well clear. Avoid extreme heat.
Safety Data Sheet
ALPINE WSG

Revision date: 2013/05/21
Version: 2.0

Keep away from oxidizable substances. Electrical equipment should conform to national electric code. Ground all transfer equipment properly to prevent electrostatic discharge. Electrostatic discharge may cause ignition.

Avoid dust formation. Dust can form an explosive mixture with air. Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy.

Storage

General advice:
Keep only in the original container in a cool, dry, well-ventilated place away from ignition sources, heat or flame. Protect containers from physical damage. Protect against contamination. The authority permits and storage regulations must be observed.

Storage incompatibility:
General advice: Segregate from foods and animal feeds.

Temperature tolerance
Protect from temperatures below: -20 °C
Changes in the properties of the product may occur if substance/product is stored below indicated temperature for extended periods of time.
Protect from temperatures above: 60 °C
Changes in the properties of the product may occur if substance/product is stored above indicated temperature for extended periods of time.

8. Exposure Controls and Personal Protection

Users of a pesticidal product should refer to the product label for personal protective equipment requirements.

Advice on system design:
Whenever possible, engineering controls should be used to minimize the need for personal protective equipment.

Personal protective equipment

RECOMMENDATIONS FOR MANUFACTURING, COMMERCIAL BLENDING, AND PACKAGING WORKERS:

Respiratory protection:
Wear respiratory protection if ventilation is inadequate. Wear a NIOSH-certified (or equivalent) organic vapour/particulate respirator. For situations where the airborne concentrations may exceed the level for which an air purifying respirator is effective, or where the levels are unknown or Immediately Dangerous to Life or Health (IDLH), use NIOSH-certified full facepiece pressure demand self-contained breathing apparatus (SCBA) or a full facepiece pressure demand supplied-air respirator (SAR) with escape provisions.

Hand protection:
Chemical resistant protective gloves. Protective glove selection must be based on the user's assessment of the workplace hazards.

Eye protection:
Safety glasses with side-shields. Tightly fitting safety goggles (chemical goggles).

Body protection:
Body protection must be chosen depending on activity and possible exposure, e.g. head protection, apron, protective boots, chemical-protection suit.

General safety and hygiene measures:
Wear long sleeved work shirt and long work pants in addition to other stated personal protective equipment. Work place should be equipped with a shower and an eye wash. Handle in accordance with good industrial hygiene and safety practice. Personal protective equipment should be decontaminated prior to reuse. Gloves must be inspected regularly and prior to each use. Replace if necessary (e.g. pinhole leaks). Take off
9. Physical and Chemical Properties

Form: free flowing fine granules
Odour: odourless
Colour: white
pH value: approx. 6 - 8
Molten temperature: (approx. 23 °C)
Melting point: not determined
Boiling point: not determined
Vapour pressure: not applicable
Density: approx. 1.4 g/cm³
(20 °C) The statements are based on the properties of the individual components.
Relative density: 1.33
(20 °C) The product has not been tested.
Bulk density: approx. 0.405 -
0.495 kg/l
4.2645 Lb/USg
Vapour density:
not determined
Viscosity, dynamic:
not applicable
Solubility in water:
not applicable

10. Stability and Reactivity

Dust explosivity characteristics:
Kst: 74 m.bar/s
Minimum ignition energy:
> 100 mJ, 7.1 bar

Conditions to avoid:
Avoid all sources of ignition: heat, sparks, open flame. Avoid extreme temperatures. Avoid prolonged exposure to extreme heat. Avoid contamination. Avoid electro-static discharge. Avoid prolonged storage. This product may form an explosive mixture if: 1. the dust is suspended in the atmosphere as a dust cloud AND 2. the concentration of the dust is above the lower explosion limit (LEL) AND 3. the limiting oxygen concentration (LOC) is exceeded.

Substances to avoid:
strong oxidizing agents, strong acids, strong bases

Hazardous reactions:
The product is chemically stable. Hazardous polymerization will not occur. No hazardous reactions if stored and handled as prescribed/indicated.

Decomposition products:
No hazardous decomposition products if stored and handled as prescribed/indicated. Prolonged thermal loading can result in products of degradation being given off.

Thermal decomposition:
Possible thermal decomposition products:
carbon monoxide, carbon dioxide
Stable at ambient temperature. If product is heated above decomposition temperature toxic vapours may be released. To avoid thermal decomposition, do not overheat.

Oxidizing properties:
not fire-propagating
11. Toxicological information

Acute toxicity

Oral:  
Type of value: LD50  
Species: rat (female)  
Value: > 5,000 mg/kg

Inhalation:  
Type of value: LC50  
Species: rat (male/female)  
Value: > 2.07 mg/l  
Exposure time: 4 h

Dermal:  
Type of value: LD50  
Species: rat (male/female)  
Value: > 5,000 mg/kg

Irritation / corrosion:

Skin:  
Information on: Dinofuran  
Species: rabbit  
Result: Slightly irritating.

Eye:  
Information on: Dinofuran  
Species: rabbit  
Result: Slightly irritating.

Sensitization:  
Buahfar test  
Species: guinea pig  
Result: Skin sensitizing effects were not observed in animal studies.

Genetic toxicity

Information on: Dinofuran  
Mutagenicity tests revealed no genotoxic potential.

Carcinogenicity

Information on: Dinofuran  
No data available concerning carcinogenic effects.

Reproductive toxicity

Information on: Dinofuran  
No data available.

Development:
12. Ecological Information

Fish

Information on: Dinofuran
Acute:
Onchorhynchus mykiss/LC50 (96 h): > 100 mg/l
Cyprinus carpio/LC50 (96 h) > 100 mg/l

Aquatic invertebrates

Information on: Dinofuran
Acute:
Daphnia magna/EC50 (48 h): > 1,000 mg/l
shrimp/LC50 (96 h): > 0.79 mg/l

Aquatic plants

Information on: Dinofuran
Toxicity to aquatic plants:
green algae/EC50 (72 h): > 100 mg/l

Non-Mammals

Other terrestrial non-mammals:
Honey bee/LD50: 0.022 µg/bee
The product has not been tested. The statement has been derived from the properties of the individual components.

Environmental mobility:

Information on: Dinofuran
Assessment transport between environmental compartments:
Following exposure to soil, the product trickles away and can - dependent on degradation - be transported to deeper soil areas with larger water loads.

Other adverse effects:

Do not discharge product into the environment without control.

13. Disposal considerations

Waste disposal of substance:
Pesticide wastes are regulated. Improper disposal of excess pesticide, spray mix or rinsate is a violation of federal law. If pesticide wastes cannot be disposed of according to label instructions, contact the State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.
14. Transport Information

Land transport
US DOT

Not classified as a dangerous good under transport regulations

Sea transport
IMDG

Hazard class: 9
Packing group: III
ID number: UN 3077
Hazard label: 9, EHSM
Marine pollutant: YES
Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (contains DINOTEFURAN)

Air transport
IATA/CAO

Hazard class: 9
Packing group: III
ID number: UN 3077
Hazard label: 9, EHSM
Proper shipping name: ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S. (contains DINOTEFURAN)

15. Regulatory Information

Federal Regulations

Registration status: Crop Protection TSCA, US released / exempt
OSHA hazard category: No data available.
EPCRA 311/312 (Hazard categories): Not hazardous;

State regulations

CA Prop. 65:
CA PROP 65: An assessment has determined that there is no significant risk present.
16. Other Information

Refer to product label for EPA registration number.

Recommended use: Insecticide

We support worldwide Responsible Care® initiatives. We value the health and safety of our employees, customers, suppliers and neighbors, and the protection of the environment. Our commitment to Responsible Care is integral to conducting our business and operating our facilities in a safe and environmentally responsible fashion, supporting our customers and suppliers in ensuring the safe and environmentally sound handling of our products, and minimizing the impact of our operations on society and the environment during production, storage, transport, use and disposal of our products.
