#### **Ammonium Oxalate Lab Grade**

## SECTION 1: Identification of the substance/mixture and of the supplier

Product name: Ammonium Oxalate Lab Grade

Manufacturer/Supplier Trade name:

Manufacturer/Supplier Article number: S25174A

Recommended uses of the product and uses restrictions on use:

**Manufacturer Details:** 

AquaPhoenix Scientific 9 Barnhart Drive, Hanover, PA 17331

### **Supplier Details:**

Fisher Science Education 15 Jet View Drive, Rochester, NY 14624

### **Emergency telephone number:**

### **SECTION 2: Hazards identification**

# Classification of the substance or mixture:

Acute Toxicity 4 (oral) Acute Tox. Dermal 4

Signal word : Warning

## **Hazard statements:**

Harmful if swallowed

Harmful in contact with skin

### **Precautionary statements:**

If medical advice is needed, have product container or label at hand

Keep out of reach of children

Read label before use

Wash ... thoroughly after handling

Do not eat, drink or smoke when using this product

Wear protective gloves/protective clothing/eye protection/face protection

Do not eat, drink or smoke when using this product

Rinse mouth

IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell

Call a POISON CENTER or doctor/physician if you feel unwell

IF ON SKIN: Wash with soap and water Specific measures (see ... on this label) Wash contaminated clothing before reuse Dispose of contents/container to ...

## **Combustible Dust Hazard::**

**Effective date**: 12.16.2014 Page 2 of 7

#### **Ammonium Oxalate Lab Grade**

May form combustible dust concentrations in air (during processing).

#### Other Non-GHS Classification:

# **WHMIS** NFPA/HMIS

HMIS RATINGS (0-4)

# **SECTION 3: Composition/information on ingredients**

NFPA SCALE (0-4)

Ingredients:				
CAS 6009-70-7	Ammonium Oxalate ACS Grade	>99 %		
Percentages are by weig		entages are by weight		

## **SECTION 4 : First aid measures**

### **Description of first aid measures**

After inhalation: Move exposed individual to fresh air. Loosen clothing as necessary and position individual in a comfortable position. Seek medical advice if discomfort or irritation persists. If breathing difficult, give oxygen.

After skin contact: Wash affected area with soap and water. Rinse thoroughly. Seek medical attention if irritation, discomfort or vomiting persists.

After eye contact: Protect unexposed eye. Rinse/flush exposed eye(s) gently using water for 15-20 minutes. Remove contact lens(es) if able to do so during rinsing. Seek medical attention if irritation persists or if concerned.

After swallowing: Rinse mouth thoroughly. Do not induce vomiting. Have exposed individual drink sips of water. Seek medical attention if irritation, discomfort or vomiting persists.

### Most important symptoms and effects, both acute and delayed:

Irritation, Nausea, Headache, Shortness of breath.;

### Indication of any immediate medical attention and special treatment needed:

If seeking medical attention, provide SDS document to physician.

# **SECTION 5 : Firefighting measures**

### **Extinguishing media**

Suitable extinguishing agents: If in laboratory setting, follow laboratory fire suppression procedures. Use appropriate fire suppression agents for adjacent combustible materials or sources of ignition

# For safety reasons unsuitable extinguishing agents:

# Special hazards arising from the substance or mixture:

Combustion products may include carbon oxides or other toxic vapors. Thermal decomposition can lead to release of irritating gases and vapors. Avoid generating dust; fine dust dispersed in air in sufficient

according to 29CFR1910/1200 and GHS Rev. 3

**Effective date**: 12.16.2014 Page 3 of 7

#### **Ammonium Oxalate Lab Grade**

concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

### **Advice for firefighters:**

**Protective equipment:** Use NIOSH-approved respiratory protection/breathing apparatus.

**Additional information (precautions):** Move product containers away from fire or keep cool with water spray as a protective measure, where feasible. Use spark-proof tools and explosion-proof equipment.

### **SECTION 6 : Accidental release measures**

### Personal precautions, protective equipment and emergency procedures:

Wear protective equipment. Transfer to a disposal or recovery container. Use spark-proof tools and explosion-proof equipment. Use respiratory protective device against the effects of fumes/dust/aerosol. Keep unprotected persons away. Ensure adequate ventilation. Keep away from ignition sources. Protect from heat. Stop the spill, if possible. Contain spilled material by diking or using inert absorbent.

### **Environmental precautions:**

Prevent from reaching drains, sewer or waterway. Collect contaminated soil for characterization per Section 13

### Methods and material for containment and cleaning up:

If in a laboratory setting, follow Chemical Hygiene Plan procedures. Collect liquids using vacuum or by use of absorbents. Place into properly labeled containers for recovery or disposal. If necessary, use trained response staff/contractor. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air).

#### Reference to other sections:

# SECTION 7: Handling and storage

### Precautions for safe handling:

Minimize dust generation and accumulation. Wash hands after handling. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Follow good hygiene procedures when handling chemical materials. Do not eat, drink, smoke, or use personal products when handling chemical substances. If in a laboratory setting, follow Chemical Hygiene Plan. Use only in well ventilated areas. Avoid generation of dust or fine particulate. Avoid contact with eyes, skin, and clothing.

### Conditions for safe storage, including any incompatibilities:

Store in a cool location. Provide ventilation for containers. Avoid storage near extreme heat, ignition sources or open flame. Store away from foodstuffs. Store away from oxidizing agents. Store in cool, dry conditions in well sealed containers. Keep container tightly sealed.

### **SECTION 8: Exposure controls/personal protection**

**Control Parameters:** No applicable occupational exposure limits

Created by Global Safety Management, Inc. -Tel: 1-813-435-5161 - www.gsmsds.com

according to 29CFR1910/1200 and GHS Rev. 3

**Effective date**: 12.16.2014 Page 4 of 7

#### **Ammonium Oxalate Lab Grade**

**Appropriate Engineering controls:** Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use/handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor or dusts (total/respirable) below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above. Use under a fume hood. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment).

Respiratory protection:

Not required under normal conditions of use. Use suitable respiratory protective device when high concentrations are present. Use suitable respiratory protective device when aerosol or mist is formed. For spills, respiratory protection may be advisable.

Protection of skin:

The glove material has to be impermeable and resistant to the product/ the substance/ the preparation being used/handled. Selection of the glove material on consideration of the penetration times, rates of diffusion and the degradation.

Eye protection:

Safety glasses with side shields or goggles.

**General hygienic measures:** 

The usual precautionary measures are to be adhered to when handling

chemicals. Keep away from food, beverages and feed sources.

Immediately remove all soiled and contaminated clothing. Wash hands

before breaks and at the end of work. Do not inhale

gases/fumes/dust/mist/vapor/aerosols. Avoid contact with the eyes and

skin.

# SECTION 9: Physical and chemical properties

Appearance (physical state,color):	Crystal powder	Explosion limit lower: Explosion limit upper:	Not determined Not determined	
Odor:	Odorless	Vapor pressure:	Not determined	
Odor threshold:	Not determined	Vapor density:	Not determined	
pH-value:	6.4	Relative density:	Not determined	
Melting/Freezing point:	70C	Solubilities:	Soluble in water. ND = Not Determined. N/A = Not Applicable	
Boiling point/Boiling range:	Decomposes	Partition coefficient (noctanol/water):	Not determined	
Flash point (closed cup):	Not determined	Auto/Self-ignition temperature:	Not determined	
Evaporation rate:	Not determined	Decomposition temperature:	Not determined	
Flammability (solid,gaseous):	Not determined	Viscosity:	a. Kinematic:Not determined b. Dynamic: Not determined	
Density: Not determined				

## SECTION 10 : Stability and reactivity

according to 29CFR1910/1200 and GHS Rev. 3

**Effective date**: 12.16.2014 Page 5 of 7

#### **Ammonium Oxalate Lab Grade**

### Reactivity:

**Chemical stability:**No decomposition if used and stored according to specifications.

Possible hazardous reactions:Oxalates slowly corrode steel

**Conditions to avoid:**Store away from oxidizing agents, strong acids or bases.Incompatible materials, dust generation, excess heat.Oxalates slowly corrode steel.

**Incompatible materials:**Strong acids.Strong bases.Oxidizing agents

**Hazardous decomposition products:**Nitrogen oxides, carbon dioxide, ammonia, carbon monoxide, formic acid. Carbon oxides (CO, CO2).

### **SECTION 11: Toxicological information**

Acute Toxicity: No additional information.			
Chronic Toxicity: No additional information.			
Corrosion Irritation: No additional information.			
Sensitization:	No additional information.		
Single Target Organ (STOT):	No additional information.		
Numerical Measures:	No additional information.		
Carcinogenicity:	No additional information.		
Mutagenicity:	No additional information.		
Reproductive Toxicity:	No additional information.		

# **SECTION 12: Ecological information**

**Ecotoxicity Persistence and degradability**: Readily degradable in the environment.

**Bioaccumulative potential:** 

Mobility in soil:

Other adverse effects:

# **SECTION 13: Disposal considerations**

#### Waste disposal recommendations:

Product/containers must not be disposed together with household garbage. Do not allow product to reach sewage system or open water. It is the responsibility of the waste generator to properly characterize all waste materials according to applicable regulatory entities (US 40CFR262.11). Consult federal state/ provincial and local regulations regarding the proper disposal of waste material that may incorporate some amount of this product.

# **SECTION 14: Transport information**

### **UN-Number**

2811

### **UN** proper shipping name

TOXIC SOLIDS, ORGANIC, N.O.S. (Ammonium Oxalate Monohydrate)

### Transport hazard class(es)

according to 29CFR1910/1200 and GHS Rev. 3

**Effective date**: 12.16.2014 Page 6 of 7

#### **Ammonium Oxalate Lab Grade**

Packing group: III

**Environmental hazard:** 

Transport in bulk:

Special precautions for user:

### SECTION 15: Regulatory information

### **United States (USA)**

#### SARA Section 311/312 (Specific toxic chemical listings):

Acute, Fire

### SARA Section 313 (Specific toxic chemical listings):

None of the ingredients is listed

#### RCRA (hazardous waste code):

None of the ingredients is listed

### TSCA (Toxic Substances Control Act):

All ingredients are listed.

### CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act):
