Worthington

SAFETY DATA SHEET

1. Identification

Product identifier Leaded Solder with Rosin Core

Other means of identification

SDS number WC008
Product code Varies
Recommended use Solder.
Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information

Manufacturer/Supplier Worthington Cylinder Corporation

Address 200 Old Wilson Bridge Road

Columbus, OH 43085

United States

Email: cylinders@worthingtonindustries.com

Telephone Number: 866-928-2657

CHEMTREC - 24 HOURS:

Within US and Canada 800-424-9300

Outside US and Canada +1 703-741-5970 (collect calls accepted)

2. Hazard(s) identification

Physical hazards Not classified.

Health hazards Germ cell mutagenicity Category 2

Carcinogenicity Category 2
Reproductive toxicity Category 1A

Specific target organ toxicity, repeated Category 1 (blood, kidney, nervous system)

exposure

OSHA defined hazards Not classified.

Label elements

Signal word Danger

Hazard statement Suspected of causing genetic defects. Suspected of causing cancer. May damage fertility or the

unborn child. Causes damage to organs (blood, kidney, nervous system) through prolonged or

repeated exposure.

Precautionary statement

Prevention Obtain special instructions before use. Do not handle until all safety precautions have been read

and understood. Do not breathe dust/fume. Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face

protection.

Response If exposed or concerned: Get medical advice/attention.

Storage Store locked up.

Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise

classified (HNOC)

None known.

3. Composition/information on ingredients

Mixtures

Leaded Solder with Rosin Core SDS US

909049 Version #: 01 Revision date: - Issue date: 30-June-2015

Chemical name	CAS number	%
Lead	7439-92-1	30-70
Tin	7440-31-5	30-70
Rosin, hydrogenated	65997-06-0	1-4

Composition comments

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

4. First-aid measures

Inhalation

Immediately remove from further exposure. Get immediate medical assistance. For those providing assistance, avoid exposure to yourself or others. Use adequate respiratory protection. Give supplemental oxygen, if available. If breathing has stopped, assist ventilation with a mechanical device or use mouth-to-mouth resuscitation.

Skin contact

Remove contaminated clothes and rinse skin thoroughly with water for at least 15 minutes. If skin rash or an allergic skin reaction develops, get medical attention.

Eye contact

Rinse immediately with plenty of water for at least 15 minutes. Remove any contact lenses. Get medical attention if irritation develops or persists.

Ingestion

Immediately rinse mouth and drink a cupful of water. Never give anything by mouth to a victim who is unconscious or is having convulsions. Only induce vomiting at the instruction of medical personnel. Get medical attention immediately.

Most important symptoms/effects, acute and delayed

Dust and fumes may irritate eyes, skin and upper respiratory tract. Contact with molten material may cause thermal burns.

Indication of immediate medical attention and special treatment needed

Treat symptomatically. Exposure may aggravate pre-existing lungs, diseases of the blood and blood forming organs, kidneys, nervous, and possibly reproductive systems. Symptoms may be delayed.

General information

Show this safety data sheet to the doctor in attendance.

5. Fire-fighting measures

Suitable extinguishing media

Unsuitable extinguishing media

Extinguish with foam, carbon dioxide or dry powder. Do not use water or halogenated extinguishing media.

Specific hazards arising from the chemical

Fire or high temperatures create: Metal oxides.

Special protective equipment and precautions for firefighters Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions

General fire hazards

Move containers from fire area if you can do it without risk.

Solid metal is not flammable; however, finely divided metallic dust or powder may form an explosive mixture with air.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures

Keep unnecessary personnel away. Avoid inhalation of dust from the spilled material. Wear protective clothing as described in Section 8 of this SDS. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.

Methods and materials for containment and cleaning up For a dry material spill, use a HEPA (high efficiency particle air) vacuum to collect material and place in a sealable container for disposal. Avoid dust formation. Recover and recycle, if practical. Keep out of water supplies and sewers.

Environmental precautions

Prevent further leakage or spillage if safe to do so. Do not contaminate water.

If release occurs in the U.S. and is reportable under CERCLA Section 103, notify the National

Response Center at (800)424-8802 (USA) or (202)426-2675 (USA).

Leaded Solder with Rosin Core SDS US

7. Handling and storage

Precautions for safe handling

Wear appropriate personal protective equipment (See Section 8). Keep formation of airborne dusts to a minimum. Provide appropriate exhaust ventilation at places where dust is formed. Avoid inhalation of dust and fumes. Avoid contact with skin and eyes. Do not get this material on clothing. Do not eat, drink or smoke when using the product. Wash thoroughly after handling. Avoid release to the environment. Follow special national provisions related to work with lead and its compounds. Pregnant women should not work with the product, if there is the least risk of lead exposure.

Any surface that comes in contact with molten metal must be preheated or specially coated and rust free. Inadvertent contaminants to product such as moisture, ice, snow, grease, or oil can cause an explosion when charged to a molten metal bath or metal furnace (preheating metal will remove moisture from product).

Conditions for safe storage, including any incompatibilities

Store in tightly closed original container in a dry, cool and well-ventilated place. Store in a closed container away from incompatible materials. Keep out of reach of children. Keep away from food, drink and animal feedingstuffs.

8. Exposure controls/personal protection

Occupational exposure limits

US. OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Components	туре	Value	
Lead (CAS 7439-92-1)	TWA	0.05 mg/m3	
US. OSHA Table Z-1 Limits for A	ir Contaminants (29 CFR 1910.	1000)	
Components	Туре	Value	
Tin (CAS 7440-31-5)	PEL	2 mg/m3	
US. ACGIH Threshold Limit Valu	es		
Components	Туре	Value	
Lead (CAS 7439-92-1)	TWA	0.05 mg/m3	
Tin (CAS 7440-31-5)	TWA	2 mg/m3	
US. NIOSH: Pocket Guide to Che	emical Hazards		
Components	Туре	Value

Lead (CAS 7439-92-1)	300 µg/l	Lead	Blood	*

^{* -} For sampling details, please see the source document.

Exposure guidelines

No exposure standards allocated.

Appropriate engineering

controls

Provide adequate ventilation. Observe Occupational Exposure Limits and minimize the risk of inhalation of dust. Keep melting/soldering temperatures as low as possible to minimize the generation of fume. Shower, hand and eye washing facilities near the workplace are recommended.

Individual protection measures, such as personal protective equipment

Eye/face protection Wear safety glasses with side shields (or goggles). Wear a face shield when working with molten

material.

Skin protection

Hand protection Wear protective gloves (i.e. latex, nitrile, neoprene). Other Chemical resistant clothing is recommended.

Respiratory protection

Leaded Solder with Rosin Core

Use a respirator when local exhaust or ventilation is not adequate to keep exposures below the OEL. In a confined space a supplied respirator may be required. Selection and use of respiratory protective equipment should be in accordance with OSHA General Industry Standard 29 CFR 1910.134; or in Canada with CSA Standard Z94.4. Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits.

Heat resistant/insulated gloves and clothing are recommended when working with molten material. Thermal hazards

909049 Version #: 01 Revision date: -Issue date: 30-June-2015 **General hygiene** considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective

equipment to remove contaminants.

9. Physical and chemical properties

Silver-gray metal in wire form with rosin core. **Appearance**

Physical state Solid. Wire. **Form**

Color Silver to gray. Odor Odorless. **Odor threshold** Not available. Not available. рH

361.4 - 437 °F (183 - 225 °C) Depending on composition Melting point/freezing point

Not Available

Initial boiling point and boiling

range

Not applicable. Flash point **Evaporation rate** Not available. Flammability (solid, gas) Non flammable.

Upper/lower flammability or explosive limits

Flammability limit - lower

Not available.

Flammability limit - upper

Not available.

(%)

Vapor pressure Not available. Vapor density Not available.

Relative density 8 - 11 Depending on composition

Solubility(ies)

Not soluble Solubility (water) Partition coefficient Not available.

(n-octanol/water)

Auto-ignition temperature Not applicable. **Decomposition temperature** Not available. **Viscosity** Not applicable.

Other information

Not flammable. **Flammability**

10. Stability and reactivity

Reactivity The product is non-reactive under normal conditions of use, storage and transport.

Material is stable under normal conditions. Chemical stability Possibility of hazardous Hazardous polymerization does not occur.

reactions

Conditions to avoid Contact with incompatible materials. Avoid molten metal contact with water.

Strong acids. Strong oxidizing agents. Reducing agents. Incompatible materials

Hazardous decomposition Toxic metal oxides are emitted when heated above the melting point. Lead oxide fumes may be formed at elevated temperatures. products

11. Toxicological information

Information on likely routes of exposure

Inhalation Elevated temperatures or mechanical action may form dust and fumes which may be irritating to

the mucous membranes and respiratory tract.

Skin contact Dust may irritate skin.

Elevated temperatures or mechanical action may form dust and fumes which may be irritating to Eye contact

the eye.

Ingestion May cause discomfort if swallowed.

Leaded Solder with Rosin Core SDS US 909049 Version #: 01 Revision date: -Issue date: 30-June-2015

Symptoms related to the physical, chemical and toxicological characteristics Elevated temperatures or mechanical action may form dust and fumes which may be irritating to the eye, mucous membranes and respiratory tract. Contact with molten material may cause thermal burns.

Information on toxicological effects

High concentrations of freshly formed fumes/dusts of metal oxides can produce symptoms of **Acute toxicity**

metal fume fever. When heated, the vapors/fumes given off may cause respiratory tract irritation.

Overexposure to Lead may lead to central nervous system disorders, characterized by

drowsiness, seizures, coma and death. It should be recognized that exposures of this magnitude in an industrial setting are extremely unlikely. Overexposure of Tin can cause irritation of the eyes,

skin, mucous membranes, and respiratory system.

Skin corrosion/irritation Dust may irritate skin.

Serious eye damage/eye

irritation

Elevated temperatures or mechanical action may form dust and fumes which may be irritating to

the eye.

Respiratory or skin sensitization

Respiratory sensitization No sensitizing effects known. Skin sensitization No sensitizing effects known.

Germ cell mutagenicity Suspected of causing genetic defects.

Carcinogenicity Suspected of causing cancer.

IARC Monographs. Overall Evaluation of Carcinogenicity

Lead (CAS 7439-92-1) 2B Possibly carcinogenic to humans.

NTP Report on Carcinogens Lead (CAS 7439-92-1)

Reasonably Anticipated to be a Human Carcinogen.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)

Not listed.

Reproductive toxicity

May damage fertility or the unborn child. Lead is a teratogen. Elevated lead exposure of either parent before pregnancy may increase the changes of miscarriage or birth defects. Continuous exposure may result in decreased fertility. Exposure of the mother during pregnancy may cause

birth defects.

Specific target organ toxicity -

single exposure

Not classified.

Specific target organ toxicity -

repeated exposure

Causes damage to organs (blood, kidney, nervous system) through prolonged or repeated

exposure.

Aspiration hazard

Not relevant, due to the form of the product.

Chronic effects

Prolonged and repeated overexposure to dust and fumes can lead to benign pneumoconiosis (stannosis). Overexposure to Lead can lead to systemic lead poisoning with symptoms of metallic taste, anemia, insomnia, weakness, constipation, abdominal pain, gastrointestinal disorders, joint and muscle pains, and muscular weakness, and may cause damage to the blood forming, nervous, kidneys and reproductive systems. Damage may include reduced fertility in both men and women, damage to the fetus of the exposed pregnant woman, anemia, muscular weakness and kidney dysfunction. Overexposure to Tin can result in benign pneumoconiosis (stannous). This form of pneumoconiosis produces progressive x-ray changes of the lungs as long as exposure exists, but there is no distinctive fibrosis, no evidence of disability and no special

complicating factors.

Further information

Lead is accumulated in the body and may cause damage to the brain and nervous system after

prolonged exposure.

12. Ecological information

Ecotoxicity Alloys in massive forms present a limited hazard for the environment.

The product is not biodegradable. Persistence and degradability

Bioaccumulative potential No data available.

Mobility in soil Alloys in massive forms are not mobile in the environment.

Other adverse effects None expected.

13. Disposal considerations

Disposal instructions Dispose in accordance with all applicable regulations.

Hazardous waste code Product contains lead a hazardous waste constituent regulated under 40 CFR 261.24.

Leaded Solder with Rosin Core SDS US Waste from residues / unused

products

Dispose of in accordance with local regulations. Scrapped material should be sent for refining to recover precious metal content. Solid metal and alloys in the form of particles may be reactive. Its hazardous characteristics, including fire and explosion, should be determined prior to disposal.

Since emptied containers may retain product residue, follow label warnings even after container is emptied.

Contaminated packaging

14. Transport information

DOT

Not regulated as dangerous goods.

IATA

Not regulated as dangerous goods.

IMDG

Not regulated as dangerous goods.

Transport in bulk according to

Not applicable.

Annex II of MARPOL 73/78 and

the IBC Code

15. Regulatory information

US federal regulations

This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication

Standard, 29 CFR 1910.1200.

All components are on the U.S. EPA TSCA Inventory List.

US Clean Water Act Notice: The use of this solder in making joints or fittings in any private or

public drinking water supply system is prohibited by the Clean Water Act.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)

Not regulated.
